

Test with confidence. Save on copper certification

Limited-time pricing
on selected copper testers

FLUKE networks

Haris Al Afaq

حارس الإفاق

Fluke Networks has been the industry benchmark for copper test and certification for decades. Today, a very high percentage of copper and fiber links worldwide are certified using Fluke Networks testers, supported by more than 130 million verified test results stored in LinkWare™ Live.

Now, for a limited time, selected copper certification models are available at exclusive promotional pricing, helping you equip your team with industry-trusted tools while saving significantly.

Promotion valid: March 2 — June 26, 2026

DSX2-8000 CableAnalyzer™ with 1-Year Premium Care Gold			
	High-performance copper certification tester for validating Cat 5e — Cat 8 and Class I/II cabling up to 40-Gigabit Ethernet with industry-leading accuracy.	Item no.	4954550
		Part no.	DSX2-8000/GLD INT
		Save 4522 USD	
DSX2-8000 CableAnalyzer™ Copper Certification Tester			
	Advanced copper certification solution designed to test and certify twisted pair cabling up to 2000 MHz (Cat 8) for high-speed networks up to 40 GbE.	Item no.	4954538
		Part no.	DSX2-8000 INT
		Save 4196 USD	
DSX2-5000 CableAnalyzer™ with 1-Year Premium Care Gold			
	Professional copper certification tester for Cat 5e — Cat 6A networks delivering fast and accurate certification results.	Item no.	4955017
		Part no.	DSX2-5000/GLD INT
		Save 2599 USD	
DSX2-5000 CableAnalyzer™ Copper Certification Tester			
	Reliable copper certification tester that verifies Cat 5e, Cat 6, and Cat 6A cabling to industry standards with fast automated test results.	Item no.	4955000
		Part no.	DSX2-5000 INT
		Save 2560 USD	
DSX-602 PRO CableAnalyzer™ with 1-Year Premium Care Gold			
	Advanced copper certification kit designed for Cat 6/6A testing, combining automated certification and professional LinkWare™ reporting.	Item no.	6008226
		Part no.	DSX-602-PRO/GLD
		Save 1396 USD	
DSX-602 PRO CableAnalyzer™ Copper Certification Tester			
	Professional copper certification tester for Cat 6 and Cat 6A installations that delivers accurate certification and comprehensive LinkWare™ reporting.	Item no.	4956200
		Part no.	DSX-602-PRO INT
		Save 1114 USD	
DSX-602 CableAnalyzer™ Copper Certification Tester			
	Entry-level copper certification solution designed for verifying Cat 6/Class E cabling installations with fast automated pass/fail results.	Item no.	4956177
		Part no.	DSX-602 INT
		Save 1370 USD	

Why trust Fluke Networks

Fluke Networks certification tools are trusted across the cabling industry because they deliver accurate, trusted results that are accepted everywhere.

All major warranty providers active in EMEA prefer results generated with Fluke Networks testers, and reports produced by the DSX™ Series of CableAnalyzers are rarely challenged. This means fewer disputes, faster approvals and greater confidence when certifying copper infrastructure.

What this means for you

- **Faster project acceptance:** Test results are trusted by system vendors and hyperscale data centers.
- **Lower risk of re-testing:** Accurate certification reduces costly project delays and disputes.
- **Industry-accepted reporting:** Reports generated with LinkWare™ PC and LinkWare™ Live are recognized by cabling manufacturers worldwide.

Built for the realities of the field

Fluke Networks copper testers are designed to support technicians through years of demanding work. Every system is built on the Versiv™ platform, engineered for durability, speed and long service life.

Key benefits include:

- Fast, automated copper certification testing
- Clear pass/fail results to reduce interpretation errors
- Professional test documentation with LinkWare™ reporting
- A modular platform that evolves with new standards

Fluke Networks doesn't just deliver test results — it delivers confidence in the field.

FLUKE PremiumCare

Uptime Protection

Protect your investment with Premium Care — Gold

Selected models in this promotion include 1-year Premium Care — Gold support. This is a comprehensive service program offered by Fluke Networks, designed to keep your tester performing at its best.

Premium Care Gold benefits include:

- Annual calibration to maintain measurement accuracy
- Fast repair turnaround to minimize downtime
- Loaner units during repair to keep projects moving
- Priority technical support
- Software and firmware updates to keep your tester current

Premium Care — Gold support helps ensure your certification tool stays reliable, accurate and ready for anything.

Don't miss this exclusive offer
